Section 2 — ON DELETE Justifications

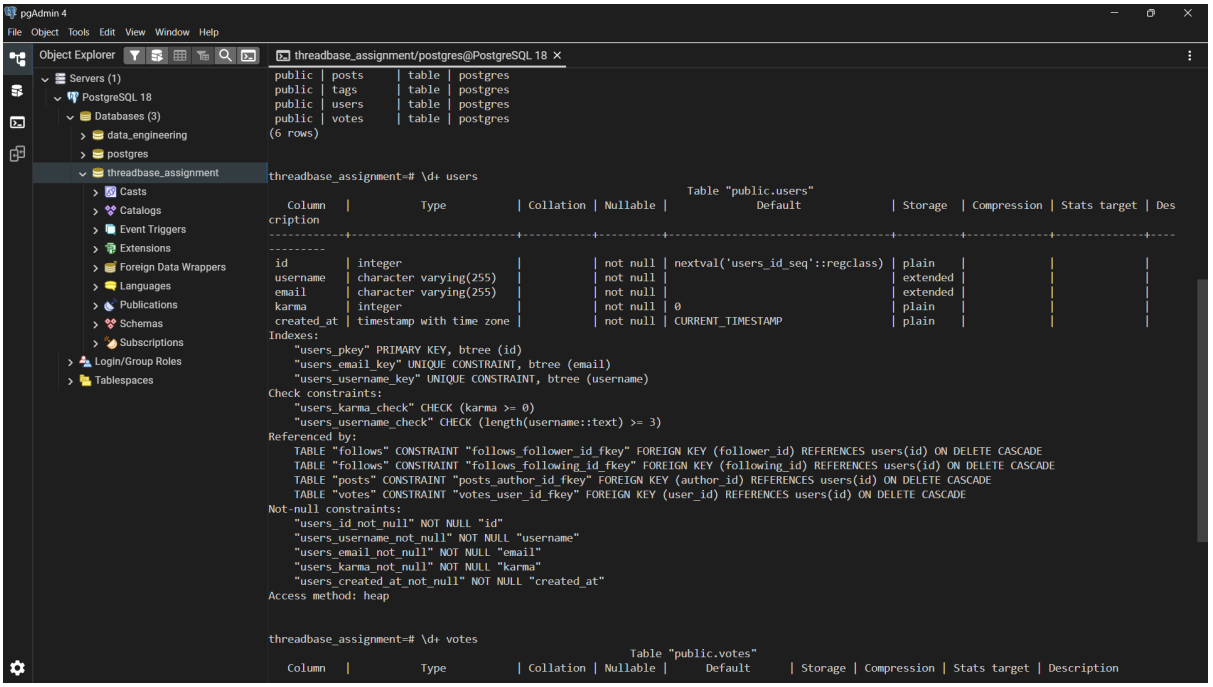

posts.author_id → ON DELETE CASCADE: Deleting a user account should remove all their authored posts automatically.
votes.user_id → ON DELETE CASCADE: Deleting a user should clean up their cast votes to maintain referential integrity.
votes.post_id → ON DELETE CASCADE: Deleting a post must remove all associated votes tied to that specific post.
post_tags.post_id → ON DELETE CASCADE: Deleting a post should remove its tag mapping relations automatically.
post_tags.tag_id → ON DELETE CASCADE: Deleting a global tag definition should clear all associations linked to posts.
follows.follower_id → ON DELETE CASCADE: Deleting the follower user account should remove their outgoing follow relationships.
follows.following_id → ON DELETE CASCADE: Deleting the followed user account should remove incoming follow connections pointing to them.
